¹ Products protected with BrandArmor[®] can be cleaned with most non-abrasive cleaners. It is recommended you first use either soap and water or one of the many citrus cleaners available in the market. In most cases, due to the low energy surface that is all that will be required. From time to time you may need to use an alternative chemical such as Acetone, Paint Thinner or MEK (taking all protective precautions called for on the manufacturer's instructions) to remove things like paint, tar, or other stubborn stains. Always test your product in an inconspicuous area first.

DO NOT USE ANY TYPE OF ABRASIVE CLEANER OR SPONGE WITH ABRASIVE SURFACE AS IT WILL DAMAGE THE SURFACE AND VOID THE WARRANTY.
